DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael E. Fogarty on 9/9/2008.

(1) Regarding claim 1:

Line 10, replace "i.e." with ---**that is**---

(2) Regarding claim 14:

Line 9, replace "i.e." with ---**that is**---

Allowable Subject Matter

2. Claims 1-16 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention describes a method and apparatus for extracting a timing component for determining a symbol from a digital modulated signal having a symbol rate f_s , comprising a frequency converting means for converting positive and negative frequency components of $f_s/2$ included in a complex baseband signal to a frequency

Art Unit: 2611

position f_m ($0 < f_m < f_s/2$), the complex baseband signal being obtained from the digital modulated signal and formed from an I signal and a Q signal; a nonlinear processing means for at least squaring the I signal and the Q signal resulting from frequency conversion by the frequency converting means; and a frequency extracting means for extracting from an output signal of the nonlinear processing means a frequency component $2f_m$, that is, a frequency component which is twice the frequency position f_m , and outputting the extracted frequency component as a timing signal. The closest prior art Kaku et al. (US 5,442,656) and Denno (US 2002/0057752 A1) fail to disclose a frequency converting means for converting positive and negative frequency components of $f_s/2$ included in a complex baseband signal to a frequency position f_m ($0 < f_m < f_s/2$) and a frequency extracting means for extracting from an output signal of the nonlinear processing means a frequency component $2f_m$. This distinct feature has been added to the independent claims 1 and 14, thus rendering claims 1-16 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SIU M. LEE whose telephone number is (571)270-1083.
